Moved by Mr. Milligan, seconded by Mr. Young to continue this matter to the February Board meeting so that the Board members may have time to review the suggested changes before legislation is proposed. Motion passed unanimously.

11. Bob Ankersmit, Plan Review Supervisor at Kootenai County Bldg Dept., requested the Board's clarification on the practice of engineering relating to requirements on submittal plans. The Board reviewed Mr. Ankersmit's questions and prepared the following answers:
  1. *When is a PE signature required?* The Board would only be willing to consider a response to this question when we know the specific provisions provided to the Building Official by the Code and what latitude is provided to the Building Official by the Code under which the plans are being reviewed. If the Code requires that a design professional prepare the plans, they must be prepared by someone licensed as a design professional by an agency of the State of Idaho.
  2. *If structural solutions are for one's own project, does that require the seal and signature of a licensed engineer?* Ownership is immaterial. If engineering is being practiced, it must be by a licensed individual.
  3. *Is "partial engineering" of a structure allowed?* The Board has issued an opinion in the past indicating that an engineer can "qualify" his responsibility by including a statement similar to "Structural Only" alongside the seal. More specifically, an engineer who stamps a plan which contains work done by others must clearly identify the work he or she is responsible for. If an engineer were to be involved in only a portion of a structure, such as a beam, the engineer would

have a responsibility to assure the load path and connections to the beam and beyond the beam are properly analyzed and the appropriate components specified.

4. *Is it acceptable to require supporting calculations?* In the Board's opinion, asking for design calculations is not an unreasonable request to make of an engineer.

5. *Does the Board intend on hosting more meetings around the state with the Engineers, Architects and Building Officials in the future?* Tentative plans call for similar workshops in the future, but a specific schedule has not yet been established.

Moved by Mr. Young, seconded by Mr. Milligan to send a letter from the Chair to Mr. Ankersmit expressing the answers reflected above. Copies of the letter to be sent to IDABO and the Board of Architectural Examiners. Motion passed unanimously.

13. Eco Engineering, LLC requested that the Board allow them to offer lighting services under the assumed business name of "Consolidated Lighting Services Company" in the State of Idaho.

Moved by Mr. Milligan, seconded by Mr. Young to authorize Eco Engineering, LLC to provide lighting services under the assumed business name of "Consolidated Lighting Services Company" in Idaho. Motion passed unanimously.

14. Tom Hansen expressed concerns that an unlicensed individual was using the title "Electrical Engineer Designer".

Moved by Mr. Milligan, seconded by Mr. Young to send a letter from the Chair explaining to Mr. Hansen that the title "Electrical Engineer Designer" would not be a problem if the individual is working under the supervision of a PE. However, services cannot be offered by unlicensed personnel. The Board invites Mr. Hansen to submit further information if he feels that there is a violation. Motion passed unanimously.

Jack Clark joined the meeting.

8. Jack Clark met with the Board to discuss the meaning of Idaho Code 55-1908(2). The Board noted Mr. Clark's concerns and will consider possible amendments to the licensing law to address the problem. The Chair appointed Mr. Young and Mr. Howe to work with ISPLS in this matter.
